

**Product Defect Correction
Mylanta Antacid Double
Strength Oral Liquid
500mL bottle**

BN: 1079278, Exp: Jun 2020

AUST R: 294406

Johnson & Johnson Pacific Pty Ltd, in consultation with the Therapeutic Goods Administration (TGA), has issued a Product Defect Correction for Mylanta Antacid Double Strength Liquid 500mL AUST R 294406 (batch number 1079278), which is a product for the quick, effective treatment of heartburn. This is due to the formation of small soft lumps in the liquid when poured, if not vigorously shaken prior to use.

Consumers are requested to replace the cap and vigorously shake the bottle until the liquid has re-suspended.

Consumers are advised that up to 15 to 20 seconds is typically sufficient to re-suspend any soft lumps.

In the event consumers are dissatisfied after vigorously shaking the product, please call Johnson & Johnson Pacific Consumer Care Centre and a refund can be obtained.
